One-page plan to action

My plan of action as director of academics would be to inform SHPE member of all the possible resources available to help us improve our academics. One of my keys to achieving high grades is using all the possible resources to their fullest potential. I want to share my knowledge of achieving high grades that I aquired throughout my years here at Sac State. Being able to get good grades as an engineering student is tough, that's why its would be my goal to help SHPE members achieve high grades in there major. I will plan to be a mentor and tutor for SHPE members to rely on when they need help in their academics. Through out my 3 years at sac state currently I have learned a lot on what it takes to achieve high grades. Therefore, it would be my responsibility to inform and advise SHPE members on the correct steps to take in order to achieve excellent grades. As director of academics I will provide SHPE members all possible resource for tutoring available each week so that they stay informed. I would also try to provide unique events where SHPE members can use their knowledge to earn rewards. I could also try to provide incentives to students who are able to achieve the highest grades so that they stay motivated through the semester. These are just some to the goals and events I plan to do if I were to be director of academics for SHPE. I hope to be part of the familia next semester.
